

Devon&Devon

CREATED IN FLORENCE. INSPIRED BY THE WORLD.

ALSO AVAILABLE WITH PVD FINISH

New Signature Taps

The new Signature line adds an exclusive collection to Devon&Devon's range of taps, blending retro elegance with cutting-edge manufacturing techniques.

Devon&Devon

CREATED IN FLORENCE. INSPIRED BY THE WORLD.

Its timeless design, which fuses elements of late 19th-century British style with sophisticated Art Deco influences, complements the diverse styles within Devon&Devon's collections of washbasins, showers, bathtubs and sanitaryware. It is the perfect match for both traditional and contemporary bathroom designs.

To enhance their streamlined aesthetic and ensure long-lasting durability, all Signature elements are crafted solely from brass, without the use of porcelain or crystal. The full range is available in chrome, light gold, polished nickel and bronze finishes, with a wide selection of additional finishes available upon request.

Signature is the first range of Devon&Devon taps to feature PVD technology, an extremely low-impact process that guarantees maximum resistance to corrosion and abrasion, along with outstanding chemical and colour stability. These qualities make Signature PVD products (available in PVD light gold and PVD polished nickel finishes) particularly suitable for the hospitality sector.
