Beauty and sustainability:

Devon&Devon presents Aurora White and Aurora Bijoux White

Thanks to an innovative technology exclusively developed for Devon&Devon, two icons of the brand's classic-contemporary style are today available in a new version, magnificently combining beauty, sustainability and salubrity.

The neo-romantic design of bestselling bathtubs Aurora and Aurora Bijoux exudes an unmistakable charm that remains intact. Instead the material used to give the products their wavy lines, clearly inspired by 19th century design, is different.

The smooth, particularly pleasing to the touch body is made with 100% White Tec Plus, a Greenguard Gold certified sustainable material that uses Biobased® plant-derived resins. Titanium dioxide is added to the compound of this innovative mix, its well-known photocatalytic property enabling an antibacterial and antiviral action that results in healthier environments.

The four spherical feet that make Aurora Bijoux White a real jewel-like bathtub are available in aluminium with chrome, light gold, polished nickel and antique copper finishes, or in the new white acrylic version, particularly suitable for bathrooms with a more contemporary feel.

Sphere feet chrome

Sphere feet polished nickel

Sphere feet light gold

Sphere feet antique copper
