Devon&Devon si riserva il diritto di modificare il prodotto per ragioni tecnico-produttive.
Non ci riterremo in ogni caso responsabili di inconvenienti
causati dalle suddette modifiche.

PRIMA DI INIZIARE

- Prima del montaggio verificare le predisposizioni d'impianto necessarie.
- Usando la Packing List riportata alla pagina seguente, verificare che tutti gli articoli siano presenti nell'imballo. Assicurarsi che i componenti non presentino difetti visibili.
 - Se rilevate dei difetti contattate immediatamente Devon&Devon.
- Per il montaggio di questo prodotto è richiesta la presenza di almeno tre operatori.
- Le istruzioni di montaggio presuppongono che le pareti siano in bolla e abbiano una struttura idonea a sostenere il prodotto.

ATTREZZI NECESSARI (NON FORNITI DA DEVON&DEVON) PER MONTAGGIO SPECCHIO

A: Matita

B: Metro

C: Cutter

D: Trapano + Punta a muro

E: Chiave a brugola braccio lungo (4mm)

F: Livella

ISTRUZIONI DI MONTAGGIO SPECCHIO KALOS - COMPOSIZIONE A

1 - Controllare la perpendicolarità di parete e pavimento.

2 - Dopo aver verificato la perpendicolarità del muro e del pavimento e aver rimosso i componenti dalla struttura dell'imballo, appoggiare lo specchio Kalos capovolto su un piano di lavoro facendo attenzione a non graffiare lo specchio.

3 - A questo punto eseguire gli attacchi del rubinetto (curve/gomiti e flessibili non in dotazione - lunghezza flessibili consigliata 40 cm)

4 - Per evitare di danneggiare lo specchio assicurarsi di serrare delicatamente dadi e rondelle in dotazione con il rubinetto.

5 - Capovolgere lo specchio e assicurarsi che il montaggio sia stato effettuato correttamente.

6 - Tracciare sul muro con una matita l'altezza e la distanza prestabilite e segnare i punti sui cui verranno praticati i fori per il fissaggio della staffa. Forare il muro con il trapano e verificare con una livella che i fori siano allineati.

7 - Aiutandosi con una livella, fissare la piastra di aggancio al muro.

8 - Si raccomanda di far sostenere lo specchio a due persone e di avere a disposizione un'altra persona che si occuperà dei collegamenti idraulici ed elettrici.

9 - Eseguire la prova di tenuta idrica e di funzionamento delle luci.

10 - Agganciare lo specchio alla piastra a muro. Il dispositivo sul retro, regolabile con una chiave a brugola, consente di fissare lo specchio perfettamente a livello.

ISTRUZIONI DI MONTAGGIO LAVABO KALOS - COMPOSIZIONE A

1 - Dopo aver rimosso i componenti dalla struttura dell'imballo, appoggiare il lavabo a terra sopra un cartone o su un altro materiale che permetta di mantenere il prodotto integro. Procedere con il montaggio della piletta in dotazione.

2 - Tracciare sulla parete con una matita l'altezza e la distanza prestabilite e segnare i punti in cui verranno praticati i fori, che dovranno corrispondere con quelli presenti sul retro del lavabo. Dopo essersi assicurati con una livella che le tracce siano perfettamente allineate, forare il muro. Ripetere l'operazione di verifica dei fori con la livella.

3 - Inserire i tasselli nei due fori appena creati. Appoggiare il lavabo sulle viti sporgenti e bloccarlo provvisoriamente con i dadi in dotazione.

4 - Verificare nuovamente il corretto posizionamento orizzontale del lavabo usando una livella.

5 - Proseguire con l'attacco dell'impianto di scarico e assicurarsi della sua perfetta tenuta.

6 - Verificare che la colonna entri perfettamente nella sede assegnata facendola combaciare con il lavabo. Dopo aver controllato il corretto posizionamento togliere la colonna e serrare i dadi di fissaggio a muro.

7 - Fissare la piastra di bloccaggio della colonna al pavimento con del silicone.

8 - Appoggiare la colonna al muro facendola combaciare con il lavabo e la piastra a terra.

9 - Si consiglia di applicare il silicone lungo l'intero perimetro del lavabo e della colonna. Rimuovere l'eccesso di silicone utilizzando della carta e dell'alcool.

10 - Lavabo e specchio montati correttamente.

3 - Inserire i tasselli nei due fori appena creati. Appoggiare il lavabo sulle viti sporgenti e bloccarlo provvisoriamente con i dadi in dotazione.

4 - Verificare nuovamente il corretto posizionamento orizzontale del lavabo usando una livella. Controllare che la distanza tra specchio e lavabo sia uniforme.

5 - Proseguire con l'attacco dell'impianto di scarico e dell'adduzione acqua (non fornita).

6 - Verificare la corretta tenuta dell'impianto di scarico e dell'adduzione acqua.

7- Verificare che la colonna entri perfettamente nella sede assegnata facendola combaciare con il lavabo. Dopo aver controllato il corretto posizionamento togliere la colonna e serrare i dadi di fissaggio a muro.

8 - Fissare la piastra di bloccaggio della colonna al pavimento con del silicone.

Devon&Devon reserves the right to modify the product for technical and manufacturing reasons. We are not responsible for any issues arising from the aforementioned modifications.

BEFORE YOU START

- Check the systems needed before assembly.
- Using the Packing List on the following page, check that all items are included in the packing. Make sure the components have no visible faults.
- If any faults are found, contact Devon&Devon immediately.
- This product requires at least three fitters to assemble.
- These assembly instructions assume that the walls are plumb and that their structure is able to support the product.

TOOLS REQUIRED (NOT SUPPLIED BY DEVON&DEVON) TO ASSEMBLE THE MIRROR

A: Pencil

B: Tape measure

C: Cutter

D: Drill + Drill bit for walls

E: Long arm Allen key (4mm)

F: Spirit level

IMPORTANT:

MAKE SURE YOU HAVE THE CORRECT SCREWS AND WALL PLUGS FOR THE TYPE OF WALL ON WHICH THE MIRROR IS TO BE MOUNTED (X3)

BASIN AND PEDESTAL PACKING LIST

A: Kalos basin (x1)

B: Kalos pedestal (x1)

C: Drain fitting (x1)

D: Floor mounting plate (x1)

E: Screw and plug kit for mounting the basin to the wall (x1)

A

B

C

D

E

KALOS MIRROR ASSEMBLY INSTRUCTIONS - COMPOSITION A

1 - Check that the wall and floor are perpendicular.

2 - After checking that the wall and floor are perpendicular and removing the components from their packing, place the Kalos mirror upside down on a work surface, taking care not to scratch the mirror.

3 - Next, attach the tap connectors (curved and flexible connectors not supplied - recommended flexible length 40 cm).

4 - Be sure to tighten the nuts and washers supplied with the tap carefully to avoid damaging the mirror.

5 - Turn the mirror over and make sure the assembly has been carried out correctly.

6 - Use the pencil to mark the set height and distance on the wall and mark where to make the holes for attaching the bracket. Drill into the wall and use a spirit level to check that the holes align.

7 - Using a spirit level, attach the mounting plate to the wall.

8 - We recommend that two people support the mirror while a third deals with the water and electrical connections.

9 - Tests for watertightness and the correct functioning of the lights.

10 - Hook the mirror to the wall plate. The device at the back can be adjusted with an Allen key and allows the mirror to be attached perfectly level.

KALOS BASIN ASSEMBLY INSTRUCTIONS - COMPOSITION A

1 - After removing the components from their packing, lay the basin on the floor on some cardboard or other material that will keep the product intact. Proceed with assembling the supplied drain fitting.

2 - Use a pencil to mark the set height and distance on the wall and mark where to make the holes, which should correspond to those on the back of the basin. After using a spirit level to check that the marks are perfectly aligned, drill into the wall. Check the holes again with the spirit level.

3 - Insert the plugs into the two holes. Rest the basin on the protruding screws and temporarily secure it with the nuts supplied.

4 - Use the spirit level again to check that the basin is correctly positioned horizontally.

5 - Proceed with the attachment of the drain fitting and check that it is tightly sealed.

6 - Check that the pedestal fits neatly within its housing, matching it up with the basin. After checking the correct position, remove the pedestal and screw in the wall fastening nuts.

7 - Attach the pedestal mounting plate to the floor with silicone.

8 - Rest the pedestal against the wall making sure it fits together with the basin and the floor plate.

9 - We recommend applying silicone sealant all around the edges of the basin and the pedestal where they meet the wall and floor. Remove any excess silicone with paper and alcohol.

10 - Correctly assembled basin and mirror.

5 - After testing the lights, hook the mirror to the wall plate. The device on the back is adjustable with an Allen key and allows the mirror to be positioned perfectly level.

KALOS BASIN ASSEMBLY INSTRUCTIONS - COMPOSITION B

1 - After removing the components from their packing, lay the basin on the floor on some cardboard or other material that will keep the product intact. Proceed with assembling the supplied drain fitting and the tap.

2 - Use a pencil to mark the set height and distance on the wall and mark where to make the holes, which should correspond to those on the back of the basin. After using a spirit level to check that the marks are perfectly aligned, drill into the wall. Check the holes again with the spirit level.

3 - Insert the plugs into the two holes. Rest the basin on the protruding screws and temporarily secure it with the nuts supplied.

4 - Use the spirit level again to check that the basin is correctly positioned horizontally. Check that the distance between mirror and basin is even.

5 - Proceed with the attachment of the drain fitting and the water pipes (not supplied).

6 - Check for any leaks in the drain fitting and water pipes.

7 - Check that the pedestal fits neatly within its housing, matching it up with the basin. After checking the correct position, remove the pedestal and screw in the wall fastening nuts.

8 - Attach the pedestal mounting plate to the floor with silicone.

9 - Rest the pedestal against the wall making sure it fits together with the basin and the floor plate.

10 - We recommend applying silicone sealant all around the edges of the basin and the pedestal where they meet the wall and floor. Remove any excess silicone with paper and alcohol.

11 - Correctly assembled basin and mirror.

Devon&Devon behält sich das Recht vor, das Produkt aus technisch-produktiven Gründen zu ändern. Wir übernehmen keine Verantwortung für Unannehmlichkeiten, die durch diese Änderungen entstehen.

BEVOR SIE BEGINNEN

- Überprüfen Sie vor der Montage die notwendigen Anlageneinstellungen.
- Prüfen Sie anhand der Stückliste auf der nächsten Seite, ob alle Teile in der Verpackung vorhanden sind. Stellen Sie sicher, dass die Bauteile keine sichtbaren Mängel aufweisen.
- Wenn Sie einen Mangel feststellen, wenden Sie sich bitte sofort an Devon&Devon.
- Für die Montage dieses Produkts sind mindestens drei Monteure erforderlich.

Die Montageanleitung basiert auf der Annahme, dass die Wände eben sind und eine geeignete Struktur aufweisen, um das Produkt zu tragen.

MONTAGEANLEITUNG FÜR DEN SPIEGEL KALOS – AUFBAU A

1 - Prüfen Sie, ob Wand und Boden rechtwinklig zueinander stehen.

2 - Nachdem Sie die Rechtwinkligkeit von Wand und Boden überprüft und die Bauteile aus der Verpackung genommen haben, legen Sie den Spiegel Kalos kopfüber auf eine Arbeitsfläche und achten Sie darauf, dass er nicht zerkratzt wird.

3 - Stellen Sie nun die Wasserhahnanschlüsse her (Rohrbögen/Winkelstücke und Schläuche sind nicht im Lieferumfang enthalten – empfohlene Schlauchlänge ist 40 cm).

4 - Um eine Beschädigung des Spiegels zu vermeiden, sollten Sie die mitgelieferten Muttern und Unterlegscheiben vorsichtig anziehen.

5 - Drehen Sie den Spiegel um und stellen Sie sicher, dass er korrekt montiert wurde.

6 - Zeichnen Sie mit einem Bleistift die vorher festgelegte Höhe und den Abstand an der Wand an und markieren Sie die Punkte, an denen die Löcher für die Befestigung der Halterung gebohrt werden sollen. Bohren Sie Löcher in die Wand und prüfen Sie mit einer Wasserwaage, ob sie richtig ausgerichtet sind.

7 - Montieren Sie die Montageplatte unter Zuhilfenahme einer Wasserwaage an der Wand.

8 - Es wird empfohlen, dass zwei Personen den Spiegel halten, während sich eine weitere Person um die Sanitär- und Elektroanschlüsse kümmert.

9 - Prüfen Sie die Wasserdichtigkeit und die Funktionsfähigkeit der Leuchten.

10 - Befestigen Sie den Spiegel an der Wandhalterung. Durch die mit einem Inbusschlüssel verstellbare Vorrichtung auf der Rückseite kann der Spiegel perfekt waagrecht fixiert werden.

MONTAGEANLEITUNG FÜR DAS WASCHBECKEN KALOS – AUFBAU A

1 - Nachdem Sie die Bauteile aus der Verpackung genommen haben, legen Sie das Waschbecken auf dem Boden auf einen Karton oder ein anderes Material ab, damit das Produkt nicht beschädigt wird. Fahren Sie mit der Montage der mitgelieferten Ablaufgarnitur fort.

2 - Zeichnen Sie mit einem Bleistift die vorgegebene Höhe und den Abstand von der Wand an und markieren Sie die Punkte, an denen die Löcher gebohrt werden sollen, die mit denen auf der Rückseite des Waschbeckens übereinstimmen müssen. Nachdem Sie mit einer Wasserwaage überprüft haben, dass die Markierungen perfekt ausgerichtet sind, bohren Sie die Löcher in die Wand. Kontrollieren Sie die Löcher erneut mit der Wasserwaage.

3 - Setzen Sie die Dübel in die beiden soeben gebohrten Löcher ein. Setzen Sie das Waschbecken auf die hervorstehenden Schrauben und sichern Sie es provisorisch mit den mitgelieferten Muttern.

4 - Überprüfen Sie nochmals die korrekte horizontale Ausrichtung des Waschtischs mit einer Wasserwaage.

5 - Fahren Sie mit dem Anschluss des Abflusssystems fort und stellen Sie sicher, dass es perfekt abgedichtet ist.

6 - Überprüfen Sie, dass die Säule perfekt auf den vorgesehenen Platz passt, indem Sie sie mit dem Waschbecken zusammenführen. Nachdem Sie die korrekte Positionierung überprüft haben, entfernen Sie die Säule und ziehen Sie die Wandbefestigungsmuttern fest.

7 - Befestigen Sie die Befestigungsplatte der Säule mit Silikon am Boden.

8 - Platzieren Sie die Säule an der Wand und passen Sie sie an das Waschbecken und die Bodenplatte an.

9 - Es wird empfohlen, den gesamten Rand des Waschbeckens und der Säule mit Silikon zu versiegeln. Entfernen Sie überschüssiges Silikon mit Papier und Alkohol.

10 - Waschbecken und Spiegel sind korrekt montiert.

BEVOR SIE BEGINNEN

- Überprüfen Sie vor der Montage die notwendigen Anlageneinstellungen.
- Prüfen Sie anhand der Stückliste auf der nächsten Seite, ob alle Teile in der Verpackung vorhanden sind. Stellen Sie sicher, dass die Bauteile keine sichtbaren Mängel aufweisen.
- Wenn Sie einen Mangel feststellen, wenden Sie sich bitte sofort an Devon&Devon.
- Für die Montage dieses Produkts sind mindestens drei Monteure erforderlich.

Bohren Sie Löcher in die Wand und prüfen Sie mit einer Wasserwaage, ob sie richtig ausgerichtet sind.

3 - Montieren Sie die Montageplatte unter Zuhilfenahme einer Wasserwaage an der Wand.

4 - Es wird empfohlen, dass zwei Personen den Spiegel halten, während sich eine weitere Person um die Elektroanschlüsse kümmert.

5 - Nachdem Sie überprüft haben, dass das Licht funktioniert, befestigen Sie den Spiegel an der Wandhalterung. Mit der Vorrichtung auf der Rückseite, die mit einem Inbusschlüssel eingestellt werden kann, können Sie den Spiegel perfekt waagrecht fixieren.

MONTAGEANLEITUNG FÜR DAS WASCHBECKEN KALOS – AUFBAU B

1 - Nachdem Sie die Bauteile aus der Verpackung genommen haben, legen Sie das Waschbecken auf dem Boden auf einen Karton oder ein anderes Material ab, damit das Produkt nicht beschädigt wird. Fahren Sie mit der Montage der mitgelieferten Ablaufgarnitur und der Armatur fort.

2 - Zeichnen Sie mit einem Bleistift die vorgegebene Höhe und den Abstand von der Wand an und markieren Sie die Punkte, an denen die Löcher gebohrt werden sollen, die mit denen auf der Rückseite des Waschbeckens übereinstimmen müssen. Nachdem Sie mit einer Wasserwaage überprüft haben, dass die Markierungen perfekt ausgerichtet sind, bohren Sie die Löcher in die Wand. Kontrollieren Sie die Löcher erneut mit der Wasserwaage.

3 - Setzen Sie die Dübel in die beiden soeben gebohrten Löcher ein. Setzen Sie das Waschbecken auf die hervorstehenden Schrauben und sichern Sie es provisorisch mit den mitgelieferten Muttern.

4 - Überprüfen Sie nochmals die korrekte horizontale Ausrichtung des Waschtischs mit einer Wasserwaage. Überprüfen Sie, ob der Abstand zwischen dem Spiegel und dem Waschbecken gleichmäßig ist.

5 - Fahren Sie mit dem Anschluss des Abflusssystems und der Wasserzuleitung (nicht im Lieferumfang enthalten) fort.

6 - Prüfen Sie, dass das Abfluss- und Wasserzuleitungssystem richtig dicht ist.

7 - Überprüfen Sie, dass die Säule perfekt auf den vorgesehenen Platz passt, indem Sie sie mit dem Waschbecken zusammenführen. Nachdem Sie die korrekte Positionierung überprüft haben, entfernen Sie die Säule und ziehen Sie die Wandbefestigungsmuttern fest.

8 - Befestigen Sie die Befestigungsplatte der Säule mit Silikon am Boden.

9 - Platzieren Sie die Säule an der Wand und passen Sie sie an das Waschbecken und die Bodenplatte an.

10 - Es wird empfohlen, den gesamten Rand des Waschbeckens und der Säule mit Silikon zu versiegeln. Entfernen Sie überschüssiges Silikon mit Papier und Alkohol.

11 – Waschbecken und Spiegel sind korrekt montiert.

INSTRUCTIONS DE MONTAGE

Nous vous remercions d'avoir choisi un produit Devon&Devon.
Nous vous prions de bien vouloir lire ce manuel avant d'installer le produit.

Devon&Devon se réserve le droit de modifier le produit pour des raisons techniques
et productives. Nous ne pourrions en aucun cas être tenus pour responsables des
inconvenients
causés par ces changements.

AVANT DE COMMENCER

- Avant le montage, vérifier les prédispositions du système nécessaires
- En utilisant la liste d'emballage figurant à la page suivante, vérifier que tous les articles sont présents dans l'emballage. S'assurer que les composants ne présentent pas de défauts visibles.
- Si des défauts sont constatés, contacter immédiatement Devon&Devon.
- Le montage de ce produit nécessite la présence d'au moins trois opérateurs.
- Les instructions de montage partent du principe que les murs sont nivelés et ont une structure appropriée pour supporter le produit.

INSTRUCTIONS DE MONTAGE DU MIROIR KALOS - COMPOSITION A

1 - Vérifier la perpendicularité du mur et du sol.

2 - Après avoir vérifié la perpendicularité du mur et du sol et retiré les éléments de la structure de leur emballage, placer le miroir Kalos à l'envers sur une surface de travail en prenant soin de ne pas rayer le miroir.

3 - Procéder maintenant aux raccordements du robinet (les coudes et les tuyaux ne sont pas fournis - longueur de tuyau recommandée : 40 cm)

F
R
A

4 - Pour éviter d'endommager le miroir, prendre soin de serrer doucement les écrous et les rondelles fournis avec le robinet.

5 - Retourner le miroir et s'assurer qu'il est correctement monté.

6 - Tracer au crayon sur le mur la hauteur et la distance prédéterminées et marquer les points où seront percés les trous pour la fixation du support. Percer des trous dans le mur et vérifier avec un niveau que les trous sont bien alignés.

7 - À l'aide d'un niveau, fixer la plaque d'accrochage au mur.

8 - Il est recommandé de prévoir deux personnes pour soutenir le miroir et une autre personne pour s'occuper des raccordements de plomberie et d'électricité.

9 - Effectuer un test d'étanchéité à l'eau et contrôler le bon fonctionnement des lumières.

10 - Accrocher le miroir à la plaque murale. Le dispositif à l'arrière, qui peut être réglé avec une clé hexagonale, permet de fixer le miroir parfaitement à niveau.

INSTRUCTIONS DE MONTAGE DU LAVABO KALOS - COMPOSITION A

1 - Après avoir retiré les éléments de la structure de leur emballage, placer le lavabo sur le sol sur un carton ou un autre matériau qui permet au produit de rester intact. Procéder à l'installation de la bonde fournie.

2 - Tracer au crayon sur le mur la hauteur et la distance prédéterminées et marquer les points où seront percés les trous qui devront correspondre à ceux du dos du lavabo. Après s'être assuré à l'aide d'un niveau que les traces sont parfaitement alignées, percer des trous dans le mur. Répéter l'opération pour vérifier les trous avec le niveau à bulle.

3 - Introduire les chevilles dans les deux trous qui viennent d'être créés. Placer le lavabo sur les vis saillantes et le fixer provisoirement avec les écrous fournis.

4 - Vérifier à nouveau le bon positionnement horizontal du lavabo à l'aide d'un niveau.

5 - Poursuivre avec le raccordement du système d'évacuation et s'assurer qu'il est parfaitement étanche.

6 - Vérifier que la colonne s'adapte parfaitement dans son siège en la faisant correspondre avec le lavabo. Après avoir vérifié le bon positionnement, retirer la colonne et serrer les écrous de fixation au mur.

7 - Fixer la plaque de blocage de la colonne au sol avec du silicone.

8 - Placer la colonne au mur, en la faisant correspondre au lavabo et à la plaque au sol.

9 - Il est conseillé d'appliquer du silicone sur tout le périmètre du lavabo et de la colonne. Enlever l'excès de silicone à l'aide de papier et d'alcool.

10 - Lavabo et miroir correctement montés.

INSTRUCCIONES DE MONTAJE DEL ESPEJO KALOS - ENSAMBLAJE A

1 - Compruebe la perpendicularidad entre la pared y el pavimento.

2 - Una vez comprobada la perpendicularidad entre la pared y el pavimento y retirados los componentes de la estructura del embalaje, apoye el espejo Kalos del revés sobre una superficie de trabajo y procure no rayar el espejo.

3 - A continuación, conecte los elementos del grifo (las curvas/codos y tuberías flexibles no van incluidos de serie - longitud recomendada para las tuberías flexibles: 40 cm)

4 - Para no dañar el espejo, asegúrese de apretar con suavidad las tuercas y arandelas incluidas de serie con el grifo.

5 - Dele la vuelta al espejo y asegúrese de haber realizado el montaje correctamente.

6 - Señale en la pared con un lápiz la altura y la distancia preestablecidas y marque los puntos donde se harán los orificios para fijar el estribo. Taladre la pared con la taladradora y compruebe con un nivel que los orificios estén alineados.

7 - Con ayuda del nivel, fije la placa de conexión a la pared.

8 - Recomendamos sujetar el espejo entre dos personas y contar con una tercera que se ocupe de las conexiones hidráulicas y eléctricas.

9 - Compruebe la estanqueidad al agua y el funcionamiento de las luces.

10 - Enganche el espejo a la placa de pared. El dispositivo situado en la parte trasera, regulable con una llave Allen, permite fijar el espejo perfectamente a nivel.

INSTRUCCIONES DE MONTAJE DEL LAVABO KALOS - ENSAMBLAJE A

1 - Una vez retirados los componentes de la estructura del embalaje, apoye el lavabo en el suelo encima de un cartón o de otro material que permita mantener el producto en buen estado. Proceda con el montaje de la pileta de desagüe incluida de serie.

2 - Señale en la pared con un lápiz la altura y la distancia preestablecidas y marque los puntos donde se harán los orificios, que deberán coincidir con los que están presentes en la parte trasera del lavabo. Después de comprobar con un nivel que las marcas estén perfectamente alineadas, taladre la pared. Vuelva a comprobar los orificios con el nivel.

3 - Introduzca los tacos en los dos orificios que acaba de hacer. Apoye el lavabo sobre los tornillos que sobresalen y bloquéelo de forma temporal con las tuercas incluidas de serie.

4 - Vuelva a comprobar que el lavabo esté bien posicionado en el plano horizontal usando un nivel.

5 - Continúe con la instalación del desagüe y asegúrese de que la estanqueidad sea óptima.

6 - Compruebe que el pedestal quede encajado en su sitio acoplándolo al lavabo. Tras comprobar que la posición sea correcta, quite el pedestal y apriete las tuercas de fijación a la pared.

7 - Fije la placa de bloqueo del pedestal al suelo con silicona.

8 - Apoye el pedestal en la pared, encajándolo en el lavabo y en la placa del suelo.

9 - Recomendamos aplicar silicona en todo el contorno del lavabo y del pedestal. Retire el exceso de silicona con papel y alcohol.

10 - Lavabo y espejo montados correctamente.

Devon&Devon оставляет за собой право вносить в изделие технические и производственные улучшения. В любом случае, наша компания не будет нести ответственности за неудобства, вызванные данными изменениями.

ПОДГОТОВКА

- Перед монтажом проверьте подводку необходимых коммуникаций.
- По списку комплектующих, приведенному на следующей странице, проверьте наличие всех элементов в упаковке. Убедитесь, что комплектующие не имеют заметных дефектов.
 - В случае обнаружения дефектов немедленно свяжитесь с Devon&Devon.
 - Монтаж данного изделия следует выполнять, как минимум, втроем.
- В инструкции по монтажу подразумевается, что стены выровнены и выдерживают вес изделия.

ИНСТРУКЦИЯ ПО МОНТАЖУ ЗЕРКАЛА KALOS - КОНФИГУРАЦИЯ А

1 - Проверьте перпендикулярность стены относительно пола.

2 - После проверки перпендикулярности стены относительно пола и извлечения комплектующих конструкции из упаковки осторожно положите перевернутое зеркало Kalos на рабочую поверхность, стараясь не поцарапать его.

3 - Теперь выполните подсоединение крана (изгибы/колена и шланги не входят в комплектацию - рекомендуемая длина шлангов 40 см).

4 - Во избежание повреждения зеркала аккуратно затяните гайки и шайбы, входящие в комплектацию крана.

5 - Переверните зеркало и убедитесь в правильном выполнении монтажа.

6 - Отметьте карандашом на стене заранее определенную высоту и расстояние, и отметьте точки, в которых будут просверлены отверстия для крепления кронштейна. Дрелью просверлите отверстия в стене и проверьте их ровное расположение с помощью уровня.

7 - С помощью уровня прикрепите крепежную пластину к стене.

8 - Желательно, чтобы зеркало держали два человека, а третий человек занимался водопроводными и электрическими соединениями.

9 - Проверьте герметичность соединений и исправную работу подсветки.

10 - Прикрепите зеркало к пластине для настенного монтажа. Приспособление с задней стороны, регулируемое с помощью шестигранного ключа, позволяет установить зеркало ровно.

ИНСТРУКЦИЯ ПО МОНТАЖУ РАКОВИНЫ KALOS - КОНФИГУРАЦИЯ А

1 - После извлечения комплектующих конструкции из упаковки положите раковину на пол, подложив под нее лист картона или другой материал, который поможет избежать ее повреждения. Затем установите сифон, входящий в комплектацию.

2 - Отметьте карандашом на стене заранее определенную высоту и расстояние, и отметьте точки, в которых будут просверлены отверстия, которые должны совпадать с отверстиями в задней части раковины. После того как вы с помощью уровня проверите, что отверстия в точности совпадают, просверлите стену. Еще раз проверьте правильное расположение отверстий с помощью уровня.

3 - Вставьте дюбели в два только что выполненных отверстия. Установите чашу на выступающие винты и временно закрепите ее гайками, входящими в комплектацию.

4 - Еще раз проверьте правильное горизонтальное расположение раковины с помощью уровня.

5 - Затем установите слив и убедитесь в герметичности соединений.

6 - Убедитесь, что пьедестал идеально входит в специальное углубление и плотно прилегает к чаше. После проверки правильности расположения удалите пьедестал и затяните гайки настенного крепления.

7 - Прикрепите пластину напольного крепления пьедестала с использованием силиконового герметика.

8 - Прислоните пьедестал к стене так, чтобы он прилегал к чаше и к пластине напольного крепления.

9 - Рекомендуется нанести силиконовый герметик по всему периметру раковины и пьедестала. Удалите излишки герметика бумагой, смоченной спиртом.

10 - Правильный монтаж раковины и зеркала.

ПОДГОТОВКА

- Перед монтажом проверьте подводку необходимых коммуникаций.
- По списку комплектующих, приведенному на следующей странице, проверьте наличие всех элементов в упаковке. Убедитесь, что комплектующие не имеют заметных дефектов.
 - В случае обнаружения дефектов немедленно свяжитесь с Devon&Devon.
 - Монтаж данного изделия следует выполнять, как минимум, втроем.
- В инструкции по монтажу подразумевается, что стены выровнены и выдерживают вес изделия.

НЕОБХОДИМЫЙ ИНСТРУМЕНТ (НЕ ВХОДИТ В ПОСТАВКУ DEVON&DEVON) ДЛЯ МОНТАЖА ЗЕРКАЛА

A: Карандаш

B: Сантиметр

C: Канцелярский нож

D: Дрель + Сверло для стен

E: Ключ шестигранный длинный (4 мм)

F: Уровень

ВАЖНО:

УБЕДИТЕСЬ, ЧТО У ВАС ЕСТЬ ВИНТЫ И ДЮБЕЛИ ДЛЯ ТИПА СТЕНЫ, НА КОТОРОЙ БУДЕТ УСТАНОВЛЕНО ЗЕРКАЛО (3 ШТ.)

ИНСТРУКЦИЯ ПО МОНТАЖУ ЗЕРКАЛА KALOS - КОНФИГУРАЦИЯ В

1 - Проверьте перпендикулярность стены относительно пола.

2 - Отметьте карандашом на стене заранее определенную высоту и расстояние, и отметьте точки, в которых будут просверлены отверстия для крепления кронштейна. Дрелью просверлите отверстия в стене и проверьте их ровное расположение с помощью уровня.

3 - С помощью уровня прикрепите крепежную пластину к стене.

4 - Желательно, чтобы зеркало держали два человека, а третий человек занимался электрическими соединениями.

5 - После проверки исправной работы подсветки прикрепите зеркало к пластине для настенного монтажа. Приспособление с задней стороны, регулируемое с помощью шестигранного ключа, позволяет установить зеркало ровно.
